Network Camera-V5.7.52_SP Release Note-IPCE_H_G5 (2024-01-08)

Firmware Basic Information	Firmware version: V5.7.52 build240108

New Features

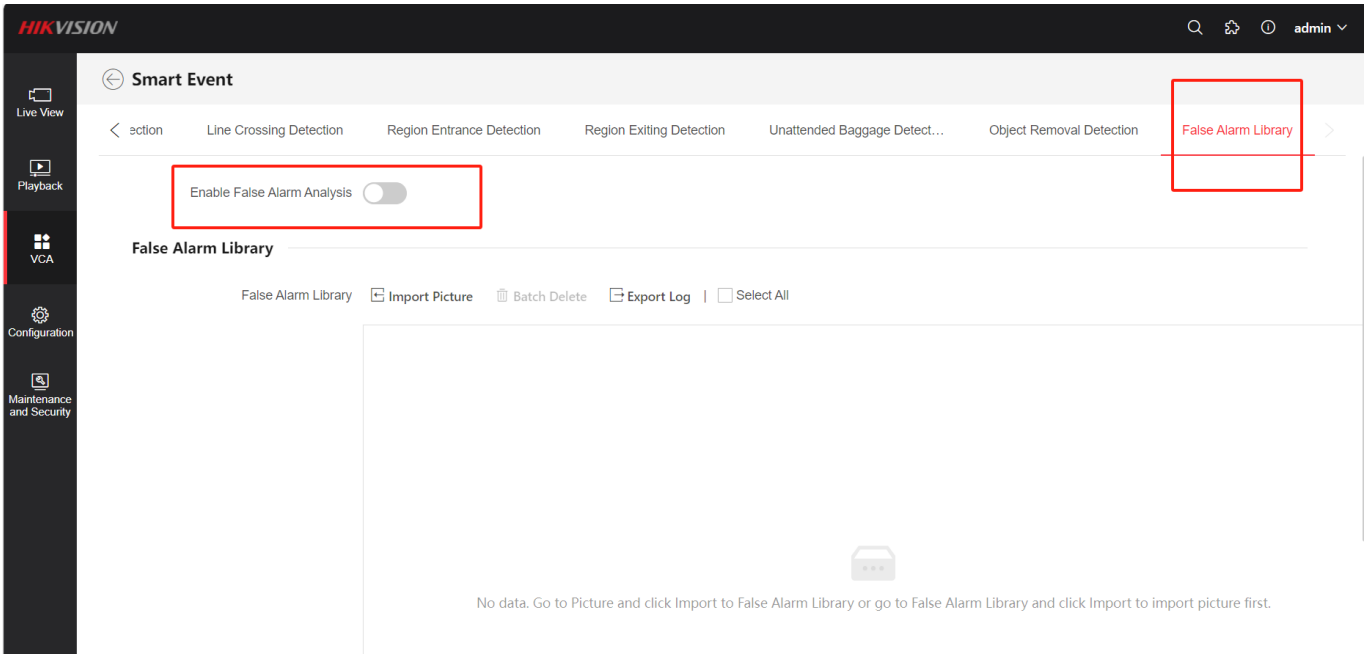
1. Support Semi Self-learning function: Intrusion, Line Crossing, Region Entrance, Region Exiting. Remove frequent false alarms caused by misclassification of a target in a single point scenario.

   1) Support false alarm image management: 100 false alarm library images; Support importing false alarm images from camera SD card, NVR, and local PC. Support deleting false alarm images

   2) Support web controls and NVR for operation configuration

   3) Due to the addition of special alarm information, the imported false alarm images must be perimeter alarm push images of G5 5.7.52 and above versions

   4) The effect of removing false alarms for individual and regular motion targets is good, reaching over 80%; For targets with multiple targets, irregular movements, and low-frequency false alarms, such as birds, insects, sandstorms, and foreign objects, the false alarm removal effect is average, and the test results within the project show a false alarm removal effect of 30% -50%



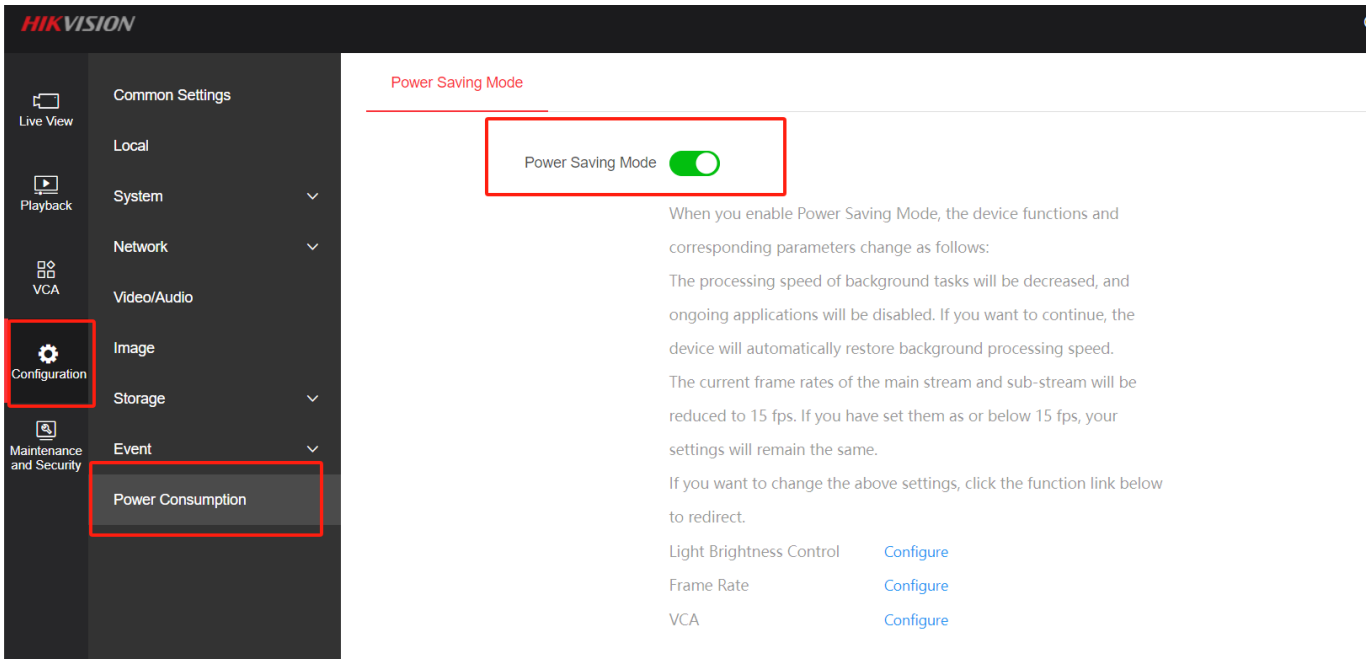
2. Support Power Saving Mode: wired products reduce operating power consumption and save the required power for operation.

1) The power saving mode supports one click activation configuration. After activation, the camera will perform the following processing: reduce the sensor acquisition frequency which will lower the VI capturemode frame rate; Reduce the brightness of the compensation light; Reduce CPU processing speed and disable deep learning intelligent services.

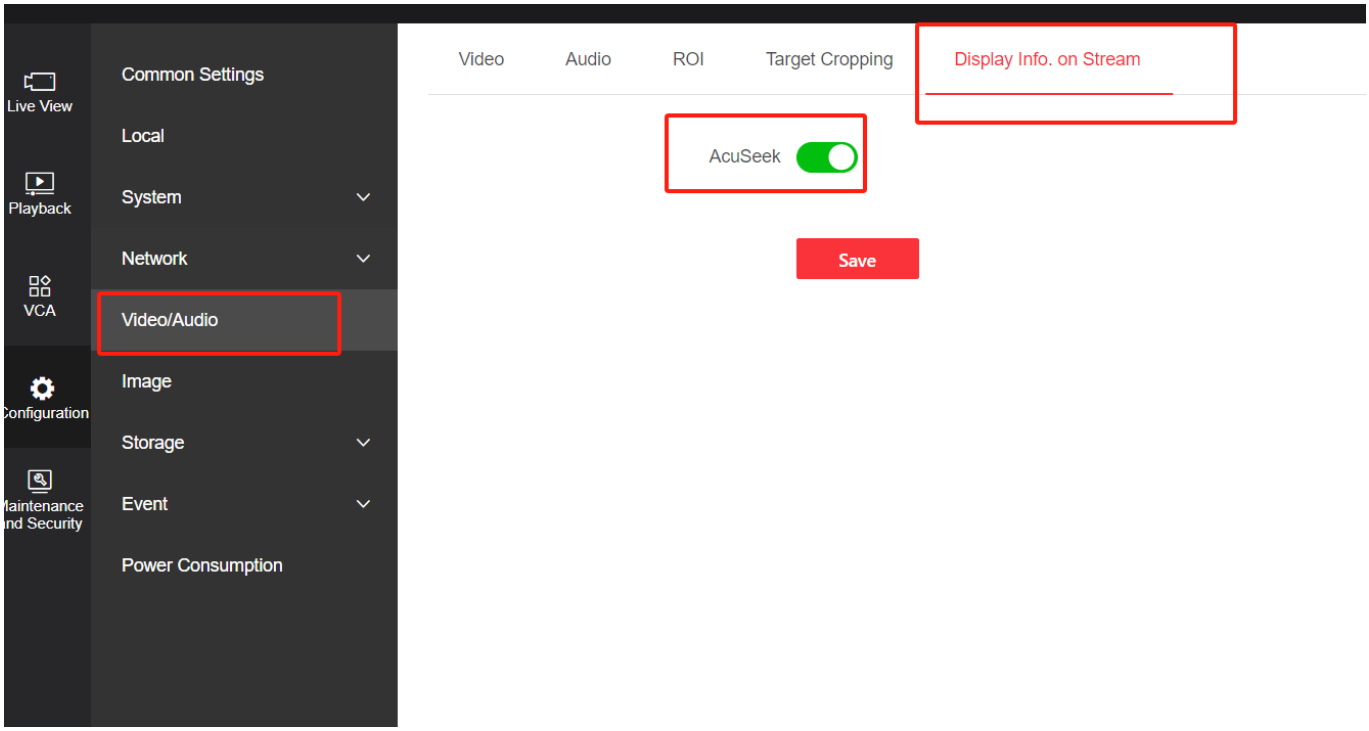
2) Disabling power-saving mode will restore the camera's default configuration

3) After the power-saving mode is enabled, the power consumption under different compensation light modes is reduced, and the power-saving effect reaches more than 23%

4) The power-saving mode configuration supports ISAPI and EZVIZ transparent ISAPI, but currently there is no configuration for end-to-end access



3. Support for AcuSearch precise target retrieval function: The AcuSearch function is a collaborative solution between IPC and NVR. IPC transmits the detection information of human and vehicle targets to NVR through POS information. After NVR parses the POS information, it marks the POS information in the video, allowing users to retrieve corresponding video clips of human and vehicle targets in the video



1) The function enable switch is located in the original "Display Info. on Stream" position,

and will be automatically enabled when connected to NVR

2) The camera overlays detailed POS information of perimeter alarm targets into the code stream and transmits it to the NVR. When the user retrieves a person and vehicle on the NVR playback interface, they select an area and search for the human and vehicle information generated in that area from the target tracking database using the normalized coordinates (0-1) selected in the box. The start and end times of the search are based on the start and end times of the person and vehicle recording, After searching, overwrite the progress bar of the original human vehicle event.

4. HEOP mirror version updated to V2.1.1, demo changed to human detection

Modify Function

1. The time for switching white light back to IR has been changed from 10s to 4s

2. Motion Detection: Modify the color change logic of the target rule for human and vehicle, and display it based on the Target Validity level

3. Fix EZVIZ library permission authentication issue

4. Smart event and face capture support metadata

5. Smart event supports overlay of stream rule information

6. Environmental noise filtering is enabled by default

7. Batch configuration tool adds password protection switch configuration

8. HEOP APP supports NEU versions

Note

Customer Impact and Recommended Action

Remarks:

- Hikvision reserves the right to change, alter or withdraw the above notification without prior notice.
- Product design and specifications are subject to change without prior notice.
- The Hikvision firmware may contain errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.
- Hikvision is not liable for any typing or printing errors.
